SOLO[®] & MILK

A LITTLE MIRACLE WITH AN EXTRA FOR FROTHED MILK

Highlights

Frothed milk steam nozzle (Pannarello)

With the Pannarello you can prepare wonderfully light frothed milk. If you like, you can also heat water or milk with it.

A slim miracle

The Solo[®] & Milk is really slim - only 20cm wide! We don't need more space than that for the high-quality Melitta[®] technology.

Double Cup Mode

It's better together - the Double Cup Mode allows you to make two cups of espresso or café crème at the same time. It is of course also suitable for those who drink a lot of coffee.

Height adjustable coffee outlet

The outlet is height-adjustable up to 135 mm so that you can also use glasses or extra large mugs.

Smart Support

Download the Melitta[®] Companion[®] app to your smartphone. There you will find practical information and tutorials. Fast service is of course also available with the app.

Unique coffee enjoyment

Aroma-Extraction-System (A.E.S.)

More flavour with pre-brewing: The freshly ground coffee is moistened with water before the actual brewing process. As a result, the flavours dissolve better and where do they end up? In your coffee, of course.

A variety of coffee specialities

As well as the three classics espresso, lungo and café crème, you can create your own coffee specialities with milk or frothed milk.

Intuitive to use

LED symbol display

It goes without saying - the LED display with red symbols makes using the fully automatic coffee machine simple and convenient.

One-Touch

What do you prefer? Café crème or espresso? These coffee varieties are pre-programmed and you can select them directly with just one touch.

Individual coffee preparation

Each coffee is unique. Use the buttons to select your preferred coffee strength. And with a single turn, you can also adjust the amount of coffee to suit the size of the cup.

Energy efficiency

When the 0 watt switch is pressed, the Solo® & Milk disconnects from the mains. Your last settings will of course be retained.

Easy to clean and to care for

Removable brewing unit

It would be nice if it were easy, wouldn't it? With Melitta® it is... The complete brewing unit is easy to remove and is simple to clean. The interior of the machine is accessible and can be cleaned without any problems.

Automatic cleaning and descaling programme

Communication is everything. Your fully automatic coffee machine informs you on the display when it needs to be cleaned or descaled.

Water filter compatibility

Fresh softened water - for better tasting coffee - The Melitta® PRO AQUA water filter is simply inserted into the water tank of the fully automatic coffee machine, providing protection against limescale deposits and long lasting improvements in water quality.
