# SOLO®

## MAKE SPACE!

### Highlights

---

#### A slim miracle

The Solo® is really slim - only 20cm wide! We don't need more space than that for the high-quality Melitta® technology.

#### Double Cup Mode

It's better together - the Double Cup Mode allows you to make two cups of espresso or café crème at the same time. It is of course also suitable for those who drink a lot of coffee.

#### Height adjustable coffee outlet

The outlet is height-adjustable up to 135 mm so that you can also use glasses or extra large mugs.

### Smart Support

---

Download the Melitta® Companion® app to your smartphone. There you will find practical information and tutorials. Fast service is of course also available with the app.

## Unique coffee enjoyment

### Aroma-Extraction-System (A.E.S.)

More flavour with pre-brewing: The freshly ground coffee is moistened with water before the actual brewing process. As a result, the flavours dissolve better.

### Three grinder settings

Coffee just the way connoisseurs like it - freshly ground from whole beans.

### 2 varieties of coffee

Enjoy the two classics espresso and café crème.

## Intuitive to use

### LED symbol display

It goes without saying - the LED display with red symbols makes the using the fully automatic coffee machine simple and convenient.

### One-Touch

What do you prefer? Café crème or espresso? These coffee varieties are pre-programmed and you can select them directly with just one touch.

### Individual coffee preparation

Each coffee is unique. Use the buttons to select your preferred coffee strength. And with a single turn, you can also adjust the amount of coffee to suit the size of the cup.

### On-off switch with 0 watt feature

Economical, but not forgetful. When the 0 watt switch is pressed, the Solo® disconnects from the mains. Your last settings will of course be retained.

## Easy to clean and to care for

### Removable brewing unit

The complete brewing unit can be easily removed and is simple to clean. The interior of the machine is accessible and can be cleaned without any problems.

### Automatic cleaning and descaling programme

Communication is everything. Your fully automatic coffee machine informs you on the display when it needs to be cleaned or descaled.
